

FEATURE LIST

Manage expenses
in the way you
prefer

Choose a flavor that suits you

Every company has different HR needs. That is why Nmbrs offers different flavors when it comes to expense management.

The [Nmbrs Expense app](#) is one that HR and finance departments in the Netherlands are licking their fingers at. For a reasonable price, many types of expenses can be submitted and settled. In addition, Nmbrs offers all its customers a simple expense module with which employees can declare receipts in the [Nmbrs ESS app](#).

Discover in this brochure how both flavors can help your HR and finance department and how the solutions differ from each other.

“Employees deserve the best HR service. Their user experience with HR apps should be just as good as other apps on their phone, for example, with which they book a taxi or holiday.”

Michiel Chevalier

CEO, Nmbrs

Nmbrs Expense

The most complete expense management app

Scan & recognize receipts

Take a photo of your receipt and Nmbrs Expense will automatically fill your claim with all the necessary information.

Calculate mileage

Simply share your travel details, including start and end points. We will then calculate the journey and associated mileage.

Submit multiple expenses at once

Are you one for big expenses? Submit multiple expenses in one report for approval.

Pay immediately

As an employee, you choose whether you want to have your expenses paid directly or settled on your next pay slip.

Manager profile

Everyone works in one app. This means that you can submit and approve declarations in the same app.

Comparison of expense management tools

Nmbrs offers two expense management tools. Nmbrs Expense is the most comprehensive solution, which fulfills all wishes in the area of declaration management. In addition, the default module is available as standard within each Nmbrs subscription.
